ANSWER SHEET

ID number

A 9 - 6 7

74

140

Amazing world.

Worth mentioning events.

It has been heard fifty years. Tyumen has gone through a large number of obstacles and climate changes. Robots, modern vehicles, work and other significant developments will be thoroughly examined further.

Robots.

There are robots on the streets and they are liberally everywhere. Robots cater for various people's needs such as asking where the main tourist attractions are located and what food to eat. Unfortunately, robots have partly replaced humankind labour, as it had been ^{long} expected. Despite this fact, everybody is used to it now.

Types of transport

There has been a substantial increase in transport quantity as well. Their shape has changed comparing to what it was like fifty years ago. Also, a new type of vehicle has been manufactured recently. It is a car and a boat at the same time with a specific software which is installed in it. You are already able to notice a few of them in Tyumen.

Integrated work.

As it was mentioned before, robotic machines have replaced people's physical labour, notably, not mainly. Moreover, human beings and robots work together now. It has made a huge impact on both Tyumen's and other cities' economy which is absolutely obsolete.

Conclusion.

To sum up, world has changed dramatically over ~~the~~ fifty years. New food, new types of transport, respectively, new ways of travelling and robots have appeared in daily lives of many people.
