ID number

A 9 - 0 6

Introduction

sp Today is the year 2020. Everything is completely different from what it was decades ago. Every aspect of our life has improved and now even those places which seemed to be boring have something to offer. This is the reason why everyone should experience visiting Russia and see how it has developed. 52

Places of interest

Russia is a modern country and has different places of interest both for tourists and natives. The most popular entertaining is cinema which has mostly benefited from new technologies. Virtual reality has changed this industry completely. Nowadays, everyone can experience almost everything without the limits of only imagination. You can imagine driving any vehicle or climbing a mountain. Also, cooking has changed and now it is possible to try any flavour and texture. This is possible because of recent chemical industry achievements. Every town and city of Russia has every one of these and it is completely different from other countries. 104

Common life.

Even common life is completely different. Every house has integrated electronics and everything is controlled with voice. Just by saying a couple of words people can get their food cooked. For more complex tasks, like planning your finances and customizing electronics to it, a special software can be used. This software is also used for working and studying, so there is no need to leave home and spend time on getting to a working or studying place. The impact and dominance of technologies are obsolete. 86

Conclusion

To sum up, modern Russia is a great place not only for traveling but also for living and I highly recommend everyone to visit Russia. 24
