A 9 - 3 7

A Guide to the Best City in Russia - Tyumen

What it is like Today.

Today we live in a world that can not exist without technology, and I can proudly say that Tyumen is one of the most technology-smart cities in Russia. Technology has truly leaped to a new level and the quality of our lives has significantly improved.

What is New.

Years ago, it was hard to imagine flying vehicles, but today it is the reality. Tyumen was the first city in the world to create flying cars. We have been using them for 10 years now and you can see the first models of the vehicle in our modern car museum. Something else that might surprise you is that students in Tyumen do not attend schools anymore. That is because each child has a personal computer with the smartest software and they take all of their classes online.

Same as Before.

Please do not think that Tyumen is only a technology-smart city. Just like 50 years ago, people love to meet in parks and talk with their friends or go to cafes together. The cafes in our city only provide organic food. That is because a factory that produces organic foods was recently opened in my hometown. It is no wonder that Tyumen is considered the healthiest city in Russia.

In the End.

Tyumen is rightfully considered the best city in Russia. Tyumen is full of smart technology, while still being a healthy and happy city.
