To: Mr. Brown, principal

From: John White, school journalist

Subject: School museum

Date: 16/02/21

Introduction

The aim of this report is to highlight the topic of students' engagement in attendance of school museum and put forward ideas on improvement of the museum.

(+) GR GR GR

Exhibition

A diversity of plants and fungi can be observed in school museum. Various species of insects are also contained there.

Survey among students

To reveal problems a survey has been performed. According to its results only the minority of students have chosen biology as their curricular subject. Though art is studied by 73% of participants of the survey.

Sp

Conclusion

Judging by facts mentioned above, several recommendations can be suggested. Art is studied by the majority of student, therefore an art section with plentiful supply of replicas of famous paintings and sculptures should be added to the museum.

GR GR GR

The number of students studying biology is rapidly decreasing, so the school authorities have to provide students interested in botanics, micology and entomology with perks and bonuses to prevent this mark from reduction or dropping to zero.
