расшифровщица.

I, Ponomarev Dmitriy, present a report that our class made. We noticed that a lot of students don't use our school museum. This is a serious problem, because museum resources are not used fully. So we decided to do a research and find out why students don't use it and we made a report that shows us the results.

Well, I think i should begin by describing our museum. It consists of 3 parts: history, literature and biology. In each section there are books, stands and other objects. There are 80 objects in total. So, everyone can get tons of information if they want. But why is this museum not popular at all? First of all, museums are just out of date. On the other hand, internet popularity is increasing rapidly because it's easier to find information there. To fix this problem we have to make a website so people can take information from there and if they like it they might visit our museum next time when they need something. The second problem is the design. All these brown colours, old tables and chairs look really boring. And because of that i think we have to get rid of old furniture and replace it. Also, we have to change these dull colours.

In conclusion, despite these issues, we think that the library is still useful and helpful. However, if we fix them the library will be more popular amongst our students and will finally be used effectively.
