School museums are some of the most important places in educational facilities. It is very important to increase engagement of student in these sorts of places.

This school museum is one of the best places for students to do research. It contains a large amount of objects and information. However, it is not used effectively by students.

This is caused by a couple of problems. First of all, they are too many limitations on how long it can be used. Therefore, students either have to do their research rapidly or avoid using museum at all. It is also important to reorganise it, because these days students often find it difficult to search for any information here.

There are some things that can be done to fix these problems. First of all, limitations on usage of museum should be, either fully or partially, scrapped, so students will be able to take their time and do their very best. In addition, it is recommended to hire more people, so museum can be properly managed. By enhancing more people into this project, the awareness of the museum will increase, as well as students involvement to it. Therefore, this output will pay out greatly.

To sum up, there are two main things that can be done in order to increase effectiveness in usage of school museum. They are: more relaxed rules on its usage and more staff.
