Improvement of the museum.

Introduction

The aim of this report is to analyze the current state of the museum, give explanations why its resources are not used fully by the students and recommend how to increase engagement of people in the museum.

The description of the school museum

The museum is located near the main building of the school. It exhibits a sufficient quantity of objects and provides a lot of information. There is a large room for people who want to read inside the museum surrounded by the smaller ones where all the books are kept.

Explanations of why it is not used effectively

Despite the museum's advantages, the students are not keen on visiting it. One of the reasons is that teenagers can search the data on the Internet whenever they want whereas the school works only on weekdays. Another explanation is that the museum is decorated with old-fashioned furniture and resembles a dull place.

Recommendations

I would strongly recommend the authorities to purchase fashionable furniture as it will remind students that museums are not boring. It is a good idea to cancel the limitation in the number of visitors so that people from other schools could come to the museum. I would also suggest having brand-new computers in the reading hall because teenagers adore technology and feel more comfortable using it rather than books.

Conclusion

To sum up, I believe these improvements would enhance the number of visitors rapidly and make them more involved with the museum.
