The report on the school museum

The school museum has been accessible to the students for many generations. However, as we all have noticed, there are less and less visitors each day. Of course, there are some serious reasons for this.

Due to the old age of the museum its condition became worse over a long period of time. The walls have cracks in them, the bookshelves and objects have suffered some considerable damage, the window frames creak as if they are about to fall apart, some monitors ~~are~~ simply don't work because of the short electricity output.

The museum is in poor condition, so the students have rapidly lost interest in visiting it and using its resources.

Moreover, nowadays the students have modern devices. That also prevents them from engagement with the resources that our museum has to offer.

To deal with these issues I propose lifting the tight budget limitation. This will help us remodel the interior of the museum, make it more modern and comfortable to work in. Furthermore, we can use modern technology to make the process of interacting with the museum's objects more interesting. For example, we can enhance the graphics in the educational videos, let a professional editor work on them.

In conclusion, we should make changes to the museum. It's necessary to make it more comfortable for the students to make the search for information quicker and easier. I hope you will consider my recommendations in the next meeting.
