Gr The evaluation of school museum's resources
 To: school authorities
 From: Darya, student
 Subject: The evaluation of school museum's resources
 Date: 16.02.2021

Introduction

Gr The aim of the report is to evaluate school museum's resources and give particular recommendations. As requested, this report contains the data of the museum.

The peculiarities of the museum

Gr The museum provides enough space for reading and discussing the presented information. Moreover, students are allowed to visit the museum from Monday to Friday. In addition, the teachers who are responsible for the museum are considered to be ready to help if there is a sudden problem.

The disadvantages of the museum's resources

Gr Undoubtedly, the museum offers a large amount of information, which should be used by students. The problem is that there is no structure. Consequently, the necessary objects can not be found immediately. Therefore, there is a reduction of student's engagement in the process of studying. The further prominent disadvantage of the museum is that there is no system of computer technology which are rapidly spreading all over the world.

Conclusion (Recommend)

Gr All points considered, it can be clearly seen that the information should be divided into groups to enhance the student's interest in studying. Obviously, the limits of time needed for searching information should be argued.

① In addition, the school should be aware of using modern technologies to output information. All necessary equipment should be provided.
