118

11 the reef

Recently my team has analysed the situation in our school. Despite the fact that local museum includes a lot of interesting facts and different objects it's still unpopular among students.

Wide museum hall contains a few collections of insects on the walls: butterflies, beetles and dragonflies. Also there are some minerals, ancient plugs and weapons of different ages.

During the search we made notes and then complete a diagramme. One of the main reasons why student don't visit our museum is light. A lot of them complain on a dark room, which makes presence in this place uncomfortable. Another thing is that some people aren't really interested in ancient coins or whatever, because they cannot touch them.

I have a few ways of solving this problems. First of all we need to replace objects in order to enhance light in room or even make an output. Supposingly it will make this place look more modern. Another step is ^{to} ask students about their hobbies and thing they're intrested in. Later it will help change something. Also we can propose to make a contribution themselves. Probably some students even have ideas that will rapidly attract visitors.

In conclusion I want to say that we only need to change some little minuses and make an engagement which should be based on student's interests. It was a pleasure for me and my team to make a research.
